

JEAN-SEBASTIEN RATEAU He/Him

New Jersey, 08844 | sebastienrateau2@gmail.com | (732) 430-5659 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

EDUCATION

Pace University, Seidenberg School of Computer Science and Information Systems
B.S. in Computer Science | **Concentration:** App Development

New York, NY
Graduated May, 2026

TECHNICAL SKILLS

Programming Languages: Python, TypeScript, JavaScript, Kotlin, Java, R

Frameworks & Libraries: React, Ionic, Capacitor, FastAPI, Flask, OpenCV

Software / Tools: Figma, Supabase, Firebase, Xcode, VS Code, WebStorm, Android Studio

PROFESSIONAL EXPERIENCE

Neptune – College Social Networking App [GitHub](#)

Remote

Founder & Lead Developer

January 2026 – Present

- Built a full-stack, near-anonymous social platform for verified college students, using React, TypeScript, Ionic, Capacitor, and Supabase for secure .edu-based authentication.
- Designed and shipped core features including messaging, image/GIF/poll posts, comments, custom avatar profiles, and an original anonymous username system unlike existing platforms; collaborated with a freelance artist on custom avatar assets and implemented caching to reduce backend egress.
- Integrated Klipy's ad API and owned the full product cycle solo from wireframes through development; nearing App Store launch pending logo and push notifications.

Pace University Tutoring Center

New York, NY

Peer Tutor - Math & Computer Science

July 2025 – May 2026

- Tutor college students in mathematics and computer science, including advanced Python, helping them improve problem-solving strategies and strengthen course performance.
- Lead one-on-one sessions using a structured 12-step tutoring framework to diagnose learning gaps, break down complex topics, and build student confidence.
- Track session notes and learning outcomes to support student progress and maintain consistency across the tutoring program.

Fleurivé – Educational App [Fleurivé](#)

Remote

Lead Developer

May 2025 – September 2025

- Designed and developed an interactive financial-literacy app for children ages 10-12, defining user personas, lesson objectives, and full learning flows.
- Created wireframes and high-fidelity UI in Figma, then built the prototype in React.js with smooth transitions, interactive modules, and Lottie animations.
- Coordinated with freelance designers and animators on character design, visual style, and animation pacing to support presentation-ready product demos.

Freelance UI/UX Designer [Fiverr](#)

Remote

UI/UX Designer

May 2024 – Present

- Designed user interfaces and user flows for multiple client projects, including a 20-screen word-search game, a vehicle rental website, and a workout app redesign.
- Delivered polished mobile and web designs tailored to client goals, balancing usability, visual clarity, and fast iteration
- Maintained a 5-star client rating through clear communication, quick turnaround times, and close attention to project requirements.

PERSONAL PROJECTS

School Data API – Android App [GitHub](#)

August 2026

- Built a native Android app in Kotlin using MVVM architecture and Retrofit to surface NYC school data and SAT scores from public APIs.

Secret Santa Matcher – Mobile App

May 2026

- Built a full-stack Kahoot-style matching app with Ionic React, TypeScript, and a Python FastApi backend, letting groups join via room PIN and auto-generate secret santa pairings.
